

RADICAL AMAZEMENT

A Spirituality Workshop

With

Fr. Terry Ryan, CSP

Reflections based on the title book by Judy Cannato

A long time ago the sun was sending energy to earth in the form of light, but there was yet no cell that could take this light and turn it into food and oxygen. Then one day, a single cell did just that. New life was on the way! Amazing. God has been sending out the light of grace from the beginning of time. One day, a receptor, a human, is able to reflect. It grasps that we are not alone. The Light is in the Beginning. It seeks a receptor, the human heart. Love breaks forth. Amazing!

Saturday, January 29, 2011
